July 2023

Larissa is a passionate web developer with a great work ethic and attitude who has assisted us in the creation of the website of our busy cafe.

Our business was missing a professional marketing strategy as we were too busy in running our up and coming business and we had no time to look into this important task.

So, we asked Larissa to create a professional Homepage which represents our business well. Within a view day, we got a first proposal of a possible site which exceeded our expectations.

After asking for some adjustments, our site was up and running within a week to our expectations. All communications over phone and email were easy and our wishes were implemented within hours.

To work with Larissa is easy as she understands the topic and the importance of a professional online appearance.

We are very happy with the result and will continue to work with Larissa in the future.

Many thanks and all the best,

Reto and Heike Bodenburg
